Hi Bart,

I received your message and I do have some questions, but I think I understand what you are requesting.

I will be on business travel this coming Monday through Wednesday (10/28-30/13) and will return on Thursday. Please consider that we arrange for a time when your available so that we can discuss over the phone. I will look for your email or voicemail reply upon my return.

Sincerely,

George Robin (robin.george@epa.gov)

Subject: Injection Wells

Mr Robin:

I am trying to identify some information

1) Where would could I find a list of characteristics for groundwater injection --in addition to the TDS <3,000

2) would it be possible to identify the location of injection wells in the San Joaquin Valley - primarily in Kern County --other than wells under the supervision of DOGGR?

by that I mean non Class II wells - that are not associated with the oil field E&P exclusion

If I have misstated, or poorly worded what I am looking for, please excuse me. If a call would be helpful, please let me know.

Thank you very much

Bart
